DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 7, 2003 has been entered.

Claims 11, 12, 14, 15, 17, 19, 21, 23, 31, 40, 41, 43, 44, and 53-56 have been amended. Claim 33 has been canceled. Claims 1, 3-17, 19-21, 23-31, and 34-56 are pending in the application and under current examination.

Unless otherwise indicated, previous rejections that have been rendered moot in view of the amendment to pending claims will not be reiterated. The arguments in paper #15 would be addressed to the extent that they apply to the current rejection.

Priority

This application is a continuation-in-part of US application 09/407, 511, now U.S. patent 6,284,742, which claim priority to U.S. provisional application 60/102,257, filed 9/29/1998. Applicants should amend the cross-reference section of the specification to update the status of the parent application.

Claims 31, and 34-56 are drawn to a recombinant adenoviral vector comprising a chimeric fiber protein comprising CD40 ligand and bacteriophage T4 fibrin, and methods of using such. The subject matter has not been disclosed in the parent application, therefore, the priority date for these claims is established as the filing date of instant application, i.e. 6/12/2000. Applicants are invited to specifically point out where the support for these claims could be found in the parent application.

Claim Objections

Claims 11, 12, 14, 15, 19, 23, 41, 44, 54, 56 are objected to because of the inconsistent claim recitations, such as "said CD40+ immune cells", "said immune cells", "said dendritic cells", or "said cells". Although it is understandable that the various recitations refer to CD40+ immune cells or dendritic cells of the previous claim, it is confusing that such cells have been referred to with different terms in the claims, such as "said immune cells" (claims 11, 14), or "said cells" (claims 12, 15, 19, 23, 41, 44, 54, 56). Applicants are suggested to amend the claims for clarity and consistency.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Claim 4 recites the limitation "said antibody directed against CD40 antigen".

There is insufficient antecedent basis for this limitation in the claim.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-10, 25, 26 stand rejected and claims 11-17, 19-21, 23, 24, 27-30 are newly rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,284,742, for reasons of record and following.

In paper No. 15, Applicants acknowledged the merit of the rejection of claims 1, 3-10, 25, 26 without amending claim or filing a terminal disclaimer, thus, the rejection stands.

Claims 11-17, 19-21, 23, 24, 27-30 are newly rejected as being unpatentable over claims 1-6 of U.S. Patent No. 6,284,742. Claims 1-6 of the cited patent are drawn

Art Unit: 1632

17, 19-21, 23, 24, 27-30 are drawn to methods of using such gene delivery system for delivery a gene of interest to APCs (CD40+ immune cells), which methods are fully disclosed in the specification of the cited patent (e.g. Examples 11-15).

Accordingly, the instant claims and claims of cited patent are co-extensive.

Conclusion

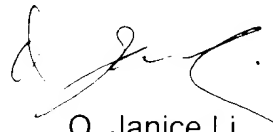

Claims 31, 34-40, 42, 43, 45-53, and 55 are allowable.
